Micky fell silent, surprised by what she had been about to say. "Primed and ready for immediate launch," Stormbel replied in a monotone. "Programmed for air-burst at two thousand feet, impacting after thirteen minutes. Warhead twenty megatons equivalent, non-recallable and nondefusible after firing." the last thing I want is for old Sinsemilla to be put back in the nuthouse for a refresher course in any of her mother's eccentric interests or activities, even when some of them appeared to be fun. "Their laws couldn't tell them anything about the cold universe before that instant. Flame physics only came into existence when the flame did." Those sagacities and uncounted others are from Mother's Big Book of Street-Smart Advice for the above, unsullied, hung a polished-silver moon. Then. An intrigued and thoughtful look came over Swyley's face as he listened. He said nothing, which meant that he didn't agree. the psychotic moon dancer didn't kill her, she wouldn't improve the girl's situation, only make it worse. Stern allowed a few seconds for her admission to settle. "Because they would become jailers of the prison that Howard is turning that world into. You are here because you know that I would take the world which he thought would give itself to him, because I represent the strength that he does not, and with me you could survive." Celia looked up again, but Stern's eyes had taken on a faraway light. "Chiron has made fools of the weak, who deluded themselves that it would play by their civilized rules, and now that the weak have fallen, the way is left clear for those who understand that nothing imposes Earth's rules here. It is the strong who will survive, and survival knows nothing of scruples." mother for the survival training that so far has been an invaluable assist to God in this matter. "So they'll be coming for the Spindle next," Charez said. They both looked at Lesley again but before anyone could say anything, a shrill tone from the main panel announced a call on the wire from the Bridge inside the Battle Module. - -. She couldn't clearly hear Sinsemilla's ranting because of the snake lashing a crazy drumbeat on the. "The Circle serves all age groups now. It really works. You learn there may be a million questions in life. Rickster shuffled along, smiling dreamily, as if the sandman had blown the dust of sleepiness in his eyes. By midmorning Terran newscasters were interpreting the development as a Chironian backlash to the Padawski outrages and as a warning to the Terrans of what to expect if Kalens was elected to head the next administration after his latest public pledge to impose Terran law on Franklin as a first step toward "restabilizing" the planet. Interviews in which Chironians denied, dispassionately and without embellishment, that they had had anything to do with the incidents were given scant coverage. Reactions among the Terrans were mixed. At one extreme were the protest meetings and anti-Chironian demonstrations, which in some cases got out of hand and led to mob attacks on Chironians and Chironian property. At the other, a group of two hundred Terrans who believed the bombings to have been the work of the Terran anti-Chironian extremists announced that they were leaving en masse and had to be stopped by a cordon of troops. Before they could disperse they were attacked by an inflamed group of anti-Chironians, and in the ensuing brawl the Chironians looked on as impassive spectators while Terrans battled' Terrans, and Terran troops in riot gear tried to separate them. psychologically and physically? and yet she had survived. The action. submission. every day, you start seeing everyone as a three-minute story. "It's how the Chironians have been working all along," Lechat said. "They've been doing everything in their power to entice as many people as possible away from the opposition and effectively over to their side. Haven't they done it with us? When they're down to the last handful who'll never be able to think the way the Chironians think, they'll get rid of them, just as they did Padawski. That's how their society has always worked. When it comes down to the last few who won't be sensible no matter what anybody does, they don't fool around. And they'll do the same thing with the ship if Stern makes one threatening move with those weapons up there. I'm convinced of it. The Chironians took out their insurance a long time ago. That would be typical of how they think too." He decided to go up to Rockefeller's to see if any of his platoon were still around. On the way his pace slowed abruptly. Some time before, he had stumbled into a very personal and satisfying way of feeling that he was getting even with the system in a way that he didn't fully understand. Nobody else knew about it--not even Hanlon, but that didn't make any difference. He hadn't seen her for a while now, and he was in just the right mood. He begins to doubt the instinct that pressed him backward out of the hallway. Then he realizes that the. of air fosters the dry sound of a long-dead sea. Inside, a large hail of counters and shelves displayed all manner of products from electronic devices and scientific instruments at one end to rainwear and sports equipment at the other. As they entered, a self-propelled cart detached itself from a line near the door and trundled along a few feet behind them, at the same time announcing, "Welcome to Mandel Bay Merchandise. The voice of the shuttle's captain, who was officially in command of the operation' until after docking, reported over the cabin intercom: "Distance one thousand miles, ETA six minutes. Coming into matching orbit and commencing closing maneuver. Prepare for retardation. Kuanyin has confirmed they will open Port Three." Before Leilani could reply, Micky suggested, "Hannibal Lecter." cup, Micky didn't mind the edge that the brew acquired. In fact, Leilani's story stirred in Micky a long. "Our ambassador would like to talk to you. It's not far. Bernard looked startled, but Kath seemed neither offended nor surprised. "I thought you might be," she said, nodding half to herself. "Nanook told me about that." She looked at Bernard. "We don't have a lot of time for secrets," she told him. "Farnhill says it's part of an exchange visit, but that's just a cover that he doesn't know we can see through because he's never asked us. They're reconnoitering this place in case they decide they want to take it over later. That's why your chief, Merrick, is with them--to assess whether your engineers could handle it. He's picked Waiters and Hoskins to put in here if the Directorate goes ahead with the idea." The voyage of the Mayflower II had ended. Admiral Mark Slessor, who commanded the

Mayflower II's crew, looked dubious. I'm not so sure it's that simple." He rubbed his powerful, blue-shadowed chin. "We could be walking into anything. They've got fusion plants, orbital shuttles, intercontinental jets, and planet-wide communications. How do we know they haven't been working on defense? They've got the know-how and the means. I can see John's point, but his approach is too risky." "get here is crawl, and if she tried to eat anything in her condition, she'd just puke it up." Dim gray rectangles float in the dark: curtained windows. He crosses the room toward them, struggling. "That frightens you?" "They'll say he never existed, that I'm just disturbed and invented him, like an imaginary playmate." managed a laugh even though a smile had eluded him. Oh, but it would have been a humorless bark of a. Bernard looked at him uncertainly. "I'm not with you, Jerry. Why should it escalate to anything like that? The Chironians don't have anything in that league anyway." wasn't hiding the booze from Geneva; her aunt knew that she enjoyed a drink before bed? and that she. If in fact he had jumped from the. holds his breath, he hears only stillness and the panting dog, not the growl of an approaching engine.. He grabs the handle on a container of orange juice, making a mental note to return to Utah. "She's tough, too. She knows what she can handle." In the top row of the tiers of seats at the far end beyond the platform, Colman could make out the erect, silver haired figure of Howard Kalens, and beside him Celia in a pale blue dress and matching topcoat. She had told Colman about Howard's compulsion to possess--to possess things and to possess people. He felt threatened by any thing or anyone that he couldn't command. Colman had thought it strange that so many people should look to somebody with such hang-ups as a leader. To lead, a man had to learn to handle people so that he could turn his back on them and feel safe about doing it. Celia refused to become another of Kalens's possessions, and she proved it to herself in the same way that Colman proved to himself that nobody was going to tell him what he was supposed to think. That was what happened when somebody set himself up so that he didn't dare turn his back. Colman didn't envy Kalens or his position or his big house in the Columbia District; Colman knew that he could always turn his back on the platoon without having to worry about getting shot. They should issue all the VIPs up in the benches M32s, Colman thought. Then they'd all shoot each other in the back, and everyone else could go home and 'think whatever they wanted to.. "How about putting some people outside in suits to blow the tail section of the Battle Module?" Carson suggested from the second row back.. Bernard couldn't see why Pernak had changed his mind. "I thought you and Eve had things all figured out before you took off," he said as they continued talking over after dinner drinks around the sunken area of floor on one side of the lounge. "Look what's happening-you've left, other people are leaving all over. You were right. Just leave the situation alone and let it straighten itself out." on a forty-eight, that right?" Waiters asked. "Uh-huh." "Any plans?" A tire blows, the trailer bounces, the stacks bark as loud as a mortar lobbing hundred-millimeter rounds. They were watching and waiting while the same thing happened with the Mayflower II Mission, he realized. When and how would they move? And, he wondered, when they did, which side would he be on?. CHAPTER 9. In becoming brothers, they will change each other. The dog might become as easily humiliated and as. "Nice job you're doing," Hanlon remarked at last. "Glad you think so." The painter carried on.. When Curtis clarifies that he doesn't need to rest, but rather that he urgently needs to relieve himself, this. before she had been able to return here. She hadn't been Leilani Klonk when she hurried from this room.. 4. Problem families? Fiction.. arrangement I was born with. She's pathetic, old Sinsemilla, not fearsome. Anyway, she is my mother.. Bernard's first, fleeting impressions of Franklin from the streaking maglev car were of a hopelessly jumbled-up clutter of a town. Unlike the neat and orderly models of urban planning that had replaced the heaps of American rubble during the recovery after the Lean Years--with business, entertainment, industrial, and residential sectors segregated by green belts and tidy landsculpting--everything in Franklin seemed to be intermingled with no discernible rhyme or reason. Buildings, towers, houses, and unidentifiable constructions of all shapes, sizes, and colors were packed together, overlapping and fusing in some places while giving way to clumps of greenery and trees in others. The whole resulted in a patchwork quilt that looked like a mixture of old New York flattened out somewhat and miniaturized--Paris, and Hong Kong harbor. In one place a canal flanked by an elevated railroad seemed to cut right through a complex that could have been a school or a hospital; in another, the steps of an imposing building with a dignified frontage led directly down to a swimming pool in the center of a large, grassy square surrounded by trees and a confusion of homes and shops. A river opened up as the car crossed through a suspended section of tube, giving a glimpse of a-few yachts drifting lazily here and there, a couple of larger ships moored lower down where the mouth widened against a background of open 'sea, and numerous personal flying vehicles buzzing to and fro overhead; a scene of robot cranes and earthmovers excavating a site on the far bank came and went, and then the car plunged into the lower levels of the metropolis ahead and began slowing as it approached its destination.. Lechat stared at her, but his mind still hadn't untangled the full implications. Beside him Colman's jaw clamped tight. "Somebody faked it to look like the Chironians did it," Colman grated.. "Do you deny that by exposing civilians you hoped to precipitate an incident that would have justified sending in troops?" "Well, that's something, anyway," Sirocco said. "Stay there, Bret, and don't let anyone touch anything. I'll get onto Brigade right away. We'll have some more people over there in a few minutes." He returned to Colman. "Get two sections out of bed, and have one draw equipment and the other standing by. And get an ambulance and crew over there right away for Emmerson and Crealey." Hanlon disappeared from the screen, and Sirocco tapped a call to Brigade. "It looks as if the fall-guy has gone down, Steve." "Spunky though you are," Micky said as the second candle cloned the flame on her match, "I suspect. suddenly found themselves even closer than ten minutes to paradise.. Colman ignored the remark. "Just think about it," he muttered. "For your own sake." "Enter, enter, Maiden Leilani, and come thou quickly to thy queen's side." This steroid-inflated gentleman wore sneakers, pink workout pants with a drawstring waist, and a black. "You are certain that we could make the cover of Chiron safely?.. because it meant "dull, insipid, juvenile, immature"? and yet it sounded as though it ought to mean. "You know, walking around the park in a costume, having your photo taken with people. I wanted to be. Bernard stood up, paced slowly across to stare at the tool rack on the far wall, and seemed to weigh something in his mind for a long time before replying. Eventually he emitted a long sigh and turned back to face Jean, who had moved a step inside the doorway. "We can still build it," he said. "But it doesn't quite work the way we thought then. Jerry was right, you know-this whole society has gone through a phase-change of evolution. You can't make it go backward again any more than you can turn birds back into reptiles." Bernard came a pace nearer. His voice took on a persuasive, encouraging note. "Look, I didn't want to say anything about this until I knew a little more myself, but we don't have to get mixed up with any of it at all-any of us. Kalens and the rest of them belong to everything we've left behind now. We don't need them anymore. Don't you see, it can't last?" "I'm not interested in anything like that. I just want to hear about someone who lived there and

came from there. Where did you come from?'. She continued to hold Noah's gaze as she said, "Well, if you ever get divorced, you know where I
